EASYFOAM® KIT

**EasyFoam®** is the syringe system for producing standardised microfoam. Using this system you can produce foam with the optimal ratio of gas to sclerosant in the mixture.

Foam sclerotherapy of varicose veins with **Aethoxysklerol®** (1% - 3%) is officially approved and recognised by the German Federal Institute for Drugs and Medical Devices (BfArM).

**ADVANTAGES**

- sterile packaging
- contains sterile gas for an optimal gas to liquid ratio in the mixture
- fixed bidirectional check valve
  - no leakage of sterile gas
- easy handling, low silicone syringes
  - silicone disrupts the foam
- optimal microfoam: standardised, stable, homogeneous, viscous and with fine bubbles
- long half-life
- tested in the marketing authorisation study (ESAF)
