COMPACT TRAINING COURSE

Sclerotherapy of Haemorrhoids

**Saturday, 20th October 2018
10 a.m. – 4 p.m.**

**Speaker and Trainer
Dr. Małgorzata Kołodziejczak**

Dear colleagues,

Hemorrhoidal disease is a common condition and experts estimate that it affects almost every second adult.

The main risk factors for the development of the disease are congenital weakness of the connective tissue, lack of fiber in food and wrong toilet habits. As many patients may fear surgery, doctors should inform them of sclerotherapy as a painless and less unpleasant method of treatment. Patients should be aware that the earlier the disease is treated, the greater the chances are that it can be cured without surgery.

Treatment of hemorrhoidal disease with sclerotherapy is safe and effective, does not require anesthesia and can be performed on an outpatient basis within minutes.

This treatment preserves the hemorrhoidal cushion which is needed for anal continence. A study showed that 88% of patients with 1st and 2nd degree hemorrhoidal disease were free from symptoms after only one treatment and up to 97% after two treatments.¹ According to the German guidelines sclerotherapy is the treatment of choice for 1st degree hemorrhoidal disease.² In the treatment of 2nd degree hemorrhoidal disease, sclerotherapy provides a good alternative to rubber band ligation or both methods can be combined.

The practical part involves live demonstrations. Patients will be examined and treated according to their individual indications. All parts of the programme will provide enough time to ask and discuss specific questions on the therapy and the entire procedure.

Kind regards

Dr. Małgorzata Kolodziejczak

PROGRAMME

Location:

Mokotow Medial Centre, Hospital of Saint Elizabeth,
Goszczynskiego street 1,
02-616 Warsaw

10 a.m. - 4p.m.

Welcome and introduction

Anatomy, morphology and physiology

Hemorrhoidal disease

- Etiology, prevalence, symptoms
- Classification and diagnosis

Sclerotherapy

- Indications and contraindications
- Technique of sclerotherapy
- Discussion of patient cases qualified for sclerotherapy treatment

Live demonstration

- Sclerotherapy on patients by experienced doctors

Lunch break

Other instrumental methods to treat hemorrhoids

Treatment of hemorrhoids

- Case presentations, movies, discussion

Summary

Programme is subject to changes!
