PHARMA

Speakers:

Dr. Univ. Parma S. Guggenbichler, phlebologist

F. X. Breu, MD, phlebologist

PROGRAMME

Dear colleagues,

In collaboration with the German Society of Phlebology the seventeenth international compact training course in Sclerotherapy is being held in English language in Munich. The intention of this course is to learn the basics of liquid and foam sclerotherapy of varicose veins, both theoretically and practically, and to be able to eliminate varicose veins effectively and safely.

The morning programme will include lectures on various sclerotherapy techniques, indications and sclerosing agents (side effects, injection volumes and concentrations). Moreover recommendations of the most recent international congresses and consensus conferences will be conveyed including advices of sclerotherapy management.

Diagnosis is assigned an important role: For that purpose, basic diagnostics with CW Doppler will be explained, as well as differentiated diagnostics with colour-duplex sonography, which as "leg vein cartography" has become the diagnostic standard all over Europe before start of therapy.

The practical part involves live demonstration of various sclerotherapy techniques as well as post-sclerotherapy procedures. Patients will be examined and treated according to their individual indications. All parts of the programme will provide enough time to ask and discuss specific questions on the therapy and the entire procedure.

S. Guggenbichler

F. X. Breu

Morning: 10:00 a.m. - approx. 1:00 p.m.

Location: Hotel Platzl
Sparkassenstraße 10,
80331 Munich
