Fax: +49 (0)611 9271-111

The EasyFoam® Kit consists of three parts:

- 10 ml low silicone disposable syringe filled with the required amount of sterile air with fixed bidirectional check valve and connector
- 5 ml low silicone disposable syringe (for injection purposes)
- needle 40 x 0.8 mm, 21G x 1½"

**EasyFoam® Kit
for optimal
microfoam production**

EASYFOAM® KIT

ADVANTAGES

FAX ORDER

EasyFoam® is the syringe system for producing standardised microfoam. Using this system you can produce foam with the optimal ratio of gas to sclerosant in the mixture.

Foam sclerotherapy of varicose veins with Aethoxysklerol® (1% - 3%) is officially approved and recognised by the German Federal Institute for Drugs and Medical Devices (BfArM).

Double syringe system with fixed bidirectional check valve, connector and needle

- sterile packaging
- contains sterile gas for an optimal gas to liquid ratio in the mixture
- fixed bidirectional check valve
 - no leakage of sterile gas
- easy handling, low silicone syringes
 - silicone disrupts the foam
- optimal microfoam: standardised, stable, homogeneous, viscous and with fine bubbles
- long half-life
- tested in the marketing authorisation study (ESAF)
